

City of Paterson - City Engineer

Design Data

Owner

The City of Paterson

Location

Paterson, New Jersey

In the capacity of City Engineer, we are responsible for coordinating master planning, advising stakeholders on planning matters. We review subdivisions of land and site plans. Our office provides information for individual citizens, local industries, public service groups and government officials. We oversee Capital Improvement projects; conferring with engineers, developers, architects, a variety of outside agencies and the general public in acquiring information and coordination of engineering, public works, utilities, and streets projects and related matters; provides information regarding these matters. We manage the Streets and Roads resurfacing program for over 225 miles of roads and maintain GIS plan database of those road improvements.

As City Engineer we review staff reports related to engineering activities, projects, and services. We present reports to City Council and the Mayor, commissions, and boards. We must perform a variety of public relations and outreach work related to assigned activities. Additionally, we provide oversight of the following: consultant requests for proposal for professional and/or construction services and the advertising and bid processes; evaluation of proposals and recommendation for project award; negotiation and administration of contracts for construction projects; contractor compliance with City standards and specifications, time, and budget estimates.

We are critical team members with Federal, State, and county offices of emergency management and the office of homeland security in proactive measurements to minimize potential damage as a result of flooding and assist in public safety matters during and after flood events.
