

# ***Tompkins Avenue Parking Lot Pleasantville New York***

## ***Design Data***

**Owner**  
Village of Pleasantville

■  
**Location**  
Pleasantville, New York

■  
**Total Project Cost**  
\$150,000.00

■  
**Project Features**  
Parking Facility for  
Thirty-two vehicles

Parking is at a premium in the Village's downtown area, and one of the Village's parking lots in the commercial district was in deteriorated condition. As a result of meetings with various community groups as well as Village staff. The parking lot was redesigned to provide for additional spaces, better traffic flow and improved aesthetics. The parking lot features a stone faced reinforced concrete wall, landscaping, a new drainage system, an automatic lighting system and rustic guide rails made from lumber which blend with the character of the area.
